

General Purpose

Ultrasonic Cleaning Tablets

Pro Advantage General Purpose Cleaning Tablets are used for cleaning common soils on all types of dental and medical instruments in an ultrasonic machine.

- Patented cleaning technology leaves no residue on instruments
- Completely water soluble; preserves ultrasonic unit
- Not affected by load factor. Tablets maintain efficiency even after many cleaning cycles
- Effective in all water temperatures for faster, more efficient cleaning; easily removes common soils such as blood, tissue, plaster, pumice and buffing compounds
- Pre-measured dose for easy mixing with no mess

One tablet makes one gallon (3.8L).
